

I have been very happy with Adam and the AK Irrigation team. Having a functioning irrigation system is vital to our business, we have almost 5 acres worth of plants that need water, sometimes twice a day. We have found Adam to be very responsive and professional. He has proven very capable of handling small fixes and the larger projects that come about at our nursery. Some of our irrigation challenges are more complex than most and Adam always figures out the best solution for Kennedy's. We recommend AK Irrigation to our walk in customers and landscape clients and I have never heard a complaint. Adam shows up when he says and if something unexpected comes up, he calls me, which I find very important.
